Facility Requirements

▪ **Airfield**
  — Design aircraft recommendation, demand-capacity analysis, runway length assessment

▪ **Terminal**
  — Aircraft gates, check-in facilities, passenger security screening, baggage claim, etc.

▪ **Landside**
  — Traffic counts, parking, rental car, terminal roadways, access roadways, curbside roadways

▪ **Airport/Airline Support & Other**
  — Cargo, general aviation, air traffic control tower, fuel storage, etc.
Future Alternative Terminal Locations and Airport Layout Plan

▪ The planning team is considering several sites and layouts for the future terminal

▪ Two-level facility with passenger boarding bridges

▪ Each option will require:
  — Construction of new terminal apron pavement
  — New taxilane off of Taxiway H and/or new taxiway parallel to Taxiway H
  — Improvements to existing roadways
  — Additional surface parking
  — Potential relocation of existing tenants

▪ Final siting decisions will be reflected on ALP
Airport Layout Plan (ALP)

- **Set of 20 drawings depicting existing and future airfield facilities**
  - Focuses on development on airport property
  - Includes analysis of objects in runway approaches
  - Aeroplex shown for context

- **ALP used by FAA to study airspace of proposed development**

- **Current ALP is a requirement for FAA grant funding**
Runway 18/36 Alternatives
Runway 14/32 Improvements
MRO/Hangar Alternatives

Environmental Overview

▪ “Proposed actions” that have potential to impact the environment, alter airport operations or obstruct airport navigation are required to be evaluated under the National Environmental Policy Act (NEPA) and its implementing regulations issued by the Council on Environmental Quality (CEQ) [codified in 40 CFR Parts 1500-1508].

▪ The FAA can only “unconditionally” approve change to an ALP if an environmental analysis has been prepared in accordance with NEPA and CEQ regulations.

▪ FAA Order 1050.1B and 5040.B establishes FAA policies and procedures to help airport comply with NEPA environmental review.
